BROKEREDGE

An insurance broker management system
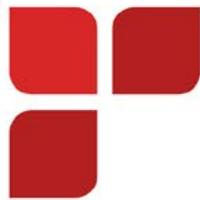

| **30+**	**30%+**	**70%+**	**30%**	**27%**	**31%**
Global Brokers as Proud Users	Growth in New Client Acquisition	Improvement in Customer Satisfaction	Improvement in Operational Productivity	Improvement in Conversion Ratio	Improvement in Retention Ratio

Build on the thorough understanding of the insurance broking value chain, BrokerEdge is all about simplifying and bringing more efficiency in broking operations. It helps brokers manage key tasks like product and policy administration, client servicing and claims processing across multiple lines of businesses faster, anytime, anywhere. This unique broker management system supports end-to-end fronting and co-brokering accounting processes, thus facilitating easy business expansion outside the current geography and into other countries. With its single view dashboard, BrokerEdge provides instant access to critical business data, thus helping brokers save time, cut costs, gain deeper insights across multiple lines of businesses and connect with insurance partners seamlessly.

BrokerEdge provides a smarter way for opportunity management, underwriting, quote processing, and maintain relationships with their customers and insurers by facilitating intuitive automation of manual processes and easy access to policy related documents.

A feature-packed broking platform, BrokerEdge helps drive productivity and business growth across General, Life, and Health insurance lines.

General	**Life**	**Health**
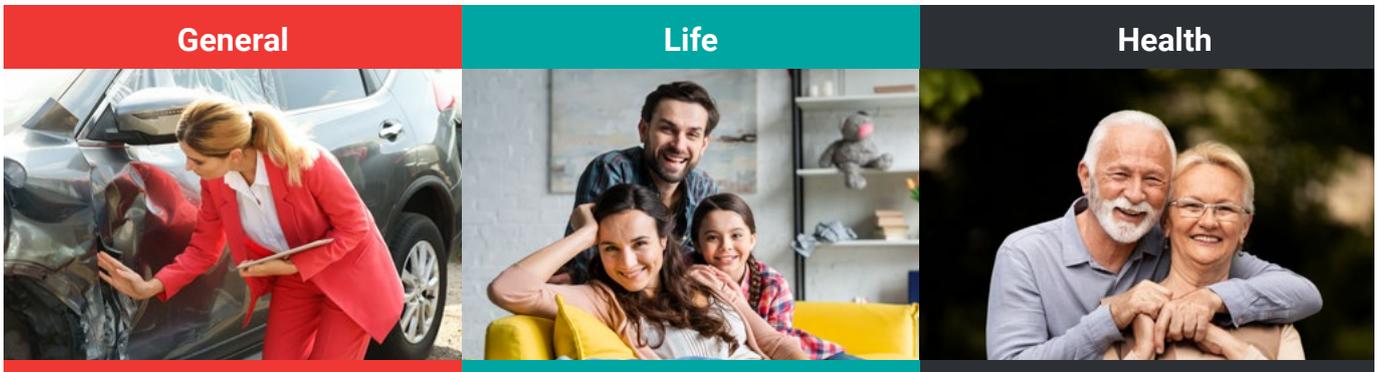

Digitalizing Brokerage Processes with Powerful Integrants

Helping brokers digitalize their end-to-end operations while delivering a seamless customer experience with scalable and easy-to-configure functionalities.

Product Administration	Policy Administration	Insurer Connectivity	Dashboard & Reporting	CRM

Digital Document Repository	Customer Portal	Producer Portal	Mobile Application
